Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 26 (page 8, line 17). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 10, 16, 18, 19, is rejected under 35 U.S.C. 103(a) as being unpatentable over French Patent 2,227,739, hereafter '739, in view of

4. '739 discloses an apparatus having a base (2); a mount (3) having a first end pivotably secured to the base to support pitching of the mount with respect to the base between a stowed position wherein the mount is juxtaposed adjacent the supporting portion of the base on a first side of the base and a deployed position suitable for towing wherein the mount extends from the base on a second side thereof (Figure 1); a hitch coupled with the mount including a first ball (20) extending in a first direction and a first

Art Unit: 3611

lock located and configured to selectively maintain the mount in one of the stowed and deployed positions (see abstract discussion of clip), further comprising a stem extending from the hitch in a third direction (the flat part of 3 supporting 20), to support the hitch relative to the mount (Figure 1), wherein the stem is coupled to the hitch by bolting (Figure 1 - shows a nut coupling 20 to the flat part of 3). '739 does not specifically disclose that the hitch includes a second ball formed integrally with the first ball and that the two are of different diameters. May discloses that a hitch may include first and second ball hitches of different diameters (col. 3, lines 42-45) formed together as a homogenous monolith of a single material, e.g., formed integrally (col. 3, lines 39-41) in order to provide an integrally formed multi-ball hitch from readily available stock material and thereby reduce manufacturing costs and increase strength (inherent benefits of forming integrally from die-cast stainless steel - column 3, lines 35-41). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the hitch including first and second balls of different diameters formed integrally on the '739 apparatus, as taught by May, in order to provide an integrally formed multi-ball hitch from readily available stock material and thereby reduce manufacturing costs and increase strength.

Allowable Subject Matter

5. Claims 33, and 21-26 are allowed. The prior art fails to disclose a mount secured to the base and positionable relative thereto between a first position wherein the mount extends from the base, and at least a second position substantially half a revolution

Art Unit: 3611

from the first position wherein the mount is juxtaposed adjacent the trunnion along with all of the rest of the recited limitations of claim 33.

6. Claims 5-9, 12 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 2, 5-10, 12, 18-26 and 33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3611

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
